PRESS RELEASE
26 June 2017

ATLAS – Raising its Game!

The Association of Technical Lightning and Access Specialists (ATLAS) is thrilled to have sponsored this year's Working at Height supplement published by Construction News, and to have exhibited at the 2017 Safety & Health Expo, reinforcing their proven expertise in health and safety when working at height.

ATLAS provides its members with up-to-date industry guidance to ensure they lead the way in health and safety standards, technical innovation and training and skills, and contributed two articles to the Working at Height supplement published on 9 June 2017. The articles highlight the need for in-depth knowledge in lightning protection; and the importance of being at the forefront of operational and safety initiatives for steeplejacks. The ATLAS logo features on every page and a full page advert is also included, promoting the incredible skills and knowledge of ATLAS members to the construction industry.

The Safety & Health Expo – the UK's no.1 health and safety event and conference – took place at ExCeL London from 20 - 22 June 2017. ATLAS exhibited alongside the Access Industry Forum (AIF) offering ATLAS excellent presence to illustrate the outstanding experience and capability their members possess. ATLAS gave away a range of literature and branded promotional items to highlight the importance of using an ATLAS member to carry out lightning protection and steeplejacking work.

ATLAS President Jason Harfield said:

'ATLAS is proud to sponsor and contribute to this years' Working at Height supplement published by Construction News, demonstrating our commitment to working practices and technical excellence. The Safety & Health Expo was a fantastic opportunity to present ATLAS and its members' expertise in the lightning protection and specialist access sector.'
